

EXIT Connect Website Handoff

📅 Sep 30, 2026 · @Someone

Overview

exitconnect.me is EXIT Connect: Maria’s brand combined with EXIT Realty Connections. Its job is to convert leads and recruit agents. GSRE (gardenstaterealest.com) stays a separate lead funnel whose leads go straight to Maria.

The site is static HTML with no database or server code, so any host can serve it. The download package **exit-connect-site.zip** (sent in the chat) holds everything to upload:

File	What it is
index.html	Home page: hero, Welcome Home paths, "somewhere different" gallery, Rooted on Main Street, How it works, Join EXIT, Meet your REALTOR, Contact us banner, footer strip
blog.html	Blog list page
blog/*.html	Four article pages, one URL each
guides.html	Free guides page (four guides)
img/	All photos and logos the pages use
sitemap.xml, robots.txt	Search engine files

The working preview lives in the EXIT Connect Website artifact; the zip matches its current version (V107, September 30 evening). Always upload the newest zip from the chat; earlier ones are out of date.

Latest changes in this version:

- How it works tabs are now a short teaser (three benefits each) with a "Get the guide" link; the detailed process lives in the guides
- Guides page keeps its two-column layout, with Maria’s photos in place of the mock book covers
- Land article rewritten as an evergreen, general guide: *How to buy land to build a home* (new address)
- Phone view: menu button, text over the hero photo, 2x2 path tiles, 3D photo carousel, stacked footer strip

Connecting exitconnect.me

Upload the unzipped `site` folder's contents to the root of any static host, then point the domain at it. The host is not decided yet, so the steps below are general.

1. Unzip **exit-connect-site.zip** and upload everything inside `site/` so `index.html` sits at the top level.
2. In the host, add the custom domain `exitconnect.me` (and `www.exitconnect.me`).
3. At the domain registrar, add the DNS records the host gives you (usually an A record for the root and a CNAME for `www`).
4. Turn on HTTPS (most hosts do this automatically once DNS resolves).
5. Set `www` to redirect to the root, or the reverse, so there is one address. The pages' search tags assume `https://exitconnect.me/` .

After launch, test:

- ☐ Home, Blog, Free guides and each article load on a computer and a phone
- ☐ Phone menu (three lines), call/text bar and arch carousel work
- ☐ Submit one form with Maria's own email and click FormSubmit's activation link (see Lead forms)
- ☐ A second test lead arrives in Gmail with the right subject line and the auto-reply arrives
- ☐ `exitconnect.me/?form=sell` opens the home value pop-up

Lead forms

Every form emails `mari.mfrag@gmail.com` through FormSubmit (free form-to-email service). Nothing goes live until Maria clicks FormSubmit's one-time activation email after the first real submission.

Form	Where it appears	Subject line
Consultation pop-up	Hero button, Request a home value, Start my search, Talk through a project, phone bar	EXIT Connect: Sell / Buy / Build / Join EXIT / Something else : Name
Contact us banner	Bottom of home page	EXIT Connect: [I'm looking to] : Name
Join EXIT (inline + pop-up)	Join EXIT section and buttons	EXIT Connect: Join EXIT : Name
Guide sign-up	Guides page, leaving pop-up, mid-	EXIT Connect: Free guide (Seller's

Auto-reply (approved by Maria): every lead gets "Thank you for your interest! I'm looking forward to being of assistance" plus a line matched to the form, then name, brokerage, address, phone, email and "Each office is independently owned and operated." It sends from FormSubmit, not Gmail.

Ad links open a form on arrival: `?form=sell` , `?form=buy` , `?form=build` , `?form=join` , `?form=guide` , `?form=seller-guide` , `?form=buyer-guide` , `?form=building-guide` , `?form=agent-guide` .

Tracking: add `utm_source` , `utm_campaign` (and optionally `utm_medium` , `utm_content` , `utm_term`) to ad links. Each lead email lists the ad source, campaign, click ID, referrer and landing page.

Spam: each form has a hidden honeypot field. After activation, FormSubmit offers a private alias to replace the Gmail address in the page code (recommended, since the address is currently visible in the source).

Blog and SEO

Each article is its own page with a search title, Google description, author and business details, a mid-article guide sign-up, an end call to action and "Keep reading" links. Lead emails show which article a lead came from.

Article	Category	Address	Guide offered
The art of finding a home	Buy	/blog/art-of-finding-a-home.html	Buyer's Guide
Adding property value: when moss is an asset, not a problem (Maria's article, condensed)	Sell	/blog/moss-adds-value.html	Seller's Guide
How to buy land to build a home: a step-by-step guide	Build	/blog/how-to-buy-land-to-build-a-home.html	Land & Building Guide
Do what you love: a real estate career built on what you care about	Join EXIT	/blog/do-what-you-love.html	Agent Career Guide

The home page also carries Maria's local business details for Google (name, office, phone, counties served).

After launch:

- ☐ Verify exitconnect.me in Google Search Console and submit `https://exitconnect.me/sitemap.xml`
- ☐ Add each new article to `sitemap.xml` when it's published
- ☐ Review the NJ licensing facts in the career article before promoting it (75-hour course)

Guides

Four evergreen, five-page guides follow the approved internal guide design and expand the EXIT RE book. Each page sequence is the same: cover, why work with an agent, a step-by-step checklist with common mistakes to avoid, local know-how, and a next-step page with one button back to the matching form plus Maria's contact details and compliance lines.

The guides use property photos only (no headshot of Maria): Seller's cover is the red barn, Agent Career's cover is the sunflowers and its second page is the greenhouse, and each last page shows a property photo or illustration above Maria's name.

Guide	Next-step button	Blog article it points to
The Seller's Guide	Request a home value (exitconnect.me/?form=sell)	Adding Property Value
The Buyer's Guide	Start my search (?form=buy)	The Art of Finding a Home
The Land & Building Guide	Talk through a project (?form=build)	How to Buy Land to Build a Home
The Agent Career Guide	Book a confidential chat (?form=join)	Do What You Love

Delivery: a guide request arrives as a lead email; the auto-reply says the guide is coming. Maria exports the matching guide as a PDF (Share, then Export) and sends it herself. To automate later, upload the four PDFs and add the download link to each guide's auto-reply.

Evergreen by design: no dates, rates or market figures. NJ rules mentioned (attorney review, smoke/CO certificate, licensing steps) should be rechecked once a year.

The website's How it works tabs stay a short teaser (three benefits per service plus a "Get the guide" link), so the guides hold the detailed checklist that the site does not.

Brand and compliance rules

The look is light, minimal and magazine-like, with generous spacing and Maria's own

photos.

Element	Value
Display type	Bodoni Moda, uppercase, wide letter spacing
Script accent	Allura (one line at a time)
Body type	Poppins, light weight
Colors	Ink #2E2D2C, paper #FCFAF7, tan #D9C7B2, mint #CFE8E1, mint-soft #EEF6F3, taupe #EAE0DA, teal #14838F, blush button #F8E9E4
Buttons	Mint pills; hero buttons turn blush on hover
Photo shapes	Circles and arches

Keep on every page: the EXIT Realty Connections logo and name, 149 Main Street, Hackettstown, NJ 07840, "Each office is independently owned and operated," and the REALTOR® / Equal Housing Opportunity logo.

Writing rules: never "no pressure" or "no rush" (use "at your convenience"); not corny; Maria’s bio is written in the third person; any outreach Maria sends herself needs her approval first (the form auto-reply is the one approved exception).

Files and links

All links below are private to Maria until shared from each page’s Share menu.

Item	Link	Use
Website preview (all pages)	EXIT Connect Website	Live working version
Site files for hosting	exit-connect-site.zip (in this chat)	Upload to the host
Seller’s Guide	deck	Lead magnet, export as PDF
Buyer’s Guide	deck	Lead magnet, export as PDF
Land & Building Guide	deck	Lead magnet, export as PDF
Agent Career Guide	deck	Lead magnet, export as PDF
Internal guides (design reference)	Seller Listings Guide , Buyer Growth Guide , Commercial & Development Guide	Approved look the client guides follow

Brand book source	EXIT RE Book (PDF uploaded to this chat)	Content source for the guides
Brand photos	Canva folders	Original photos used on the site

Open items

- ☐ Choose the host and connect exitconnect.me (in progress)
- ☐ Activate FormSubmit, then swap the Gmail address in the page code for FormSubmit's private alias
- ☐ Review the four guides and the Join EXIT article (written in Maria's voice) before launch
- ☐ Export the guides as PDFs for sending to leads
- ☐ Optional: send leads into HubSpot as well as Gmail
